Rise Against Hunger seeks to engage Hunger Champions in supporting laws, policies and systems that will help end hunger by 2030. Our 2018 Public Policy Agenda aligns with U.N. Sustainable Development Goal #2: Zero Hunger. Advocacy is a pillar of our Pathways to End Hunger, and supports our long-standing mission to grow the movement to end hunger.

**2018 PUBLIC POLICY PRIORITIES:**

**CREATE ACCESS TO EARLY CHILDHOOD NUTRITION FOR ALL**
Around the globe, 160 million children suffer from chronic undernutrition, leaving them permanently impaired and vulnerable to disease. Recognizing that nutrition is critical in the fight against hunger, we are committed to advocating for early childhood nutrition for all. Proper nutrition during the first 1,000 days of a child’s life can mean the difference between a promising future or one plagued by poor health and stunted growth — ultimately preventing families and communities from realizing their full potential.

**ESTABLISH SUSTAINABLE FOOD PRODUCTION SYSTEMS & RESILIENT AGRICULTURAL PRACTICES**
Acknowledging that agriculture is particularly vulnerable to the effects of climate change, economic fluctuations, political instability and conflict, Rise Against Hunger advocates for policies that enable individuals to be resilient in the face of these challenges.

**SECURE ADEQUATE RESOURCES FOR FOOD SECURITY AROUND THE WORLD**
Rise Against Hunger supports the preservation and expansion of resources for policies and programs that promote food security around the world. These resources may include U.S. federal government spending as well as funding from other countries and international organizations.
